

Subject Area:

Telling Time

Objectives:

The learner will . . .

- Recognize how different times look on a clock
- Match the written time with the time shown on a clock

Activity:

The learner will assemble the eggs by matching the time on the clock with the associated written time. Each assembled egg should have a top half with the written time, and the bottom half with the associated time on a clock.

Extension:

As an extension activity, the learner will pull out one half of an egg, and either write or draw the associated time on a clock.

Subject Area:

Homophones

Objectives:

The learner will . . .

- Match a word to its homophone pair
- Understand that homophones are at least two words that sound the same, but they have different meanings and spellings.

Activity:

The learner will play a homophone memory game, by first laying out all the cards face down.

The learner will turn over two cards, and collect homophone pairs. If the cards are a matching homophone pair, then the learner will keep them in a pile. The game is over once all the homophone pairs are collected.

Extension:

The learner will spell and write each homophone pair.

Subject Area:

Restaurant Role Play

Objectives:

The learner will . . .

- Use their BICS to role play being a customer at a restaurant
- Use American money to pay for their meal

Activity:

The learner will choose a partner and role play eating at a restaurant. One partner will order and pay for food, and the other partner will take the order, total their partner's bill, and take the money.

Extension:

As an extension activity, the learner can make their own restaurant menu.
